

Does Sierra Leone have a balance between electricity demand and supply?

Despite various interventions by the government, a balance between electricity demand and supply has yet to be achieved. Using the Long-range Energy Alternatives Planning System (LEAP), this work assesses Sierra Leone's energy supply and demand for 2019-2040.

Does Sierra Leone have a long-range energy alternative planning system?

Using the Long-range Energy Alternatives Planning System (LEAP), this work assesses Sierra Leone's energy supply and demand for 2019-2040. We developed three case scenarios (Base, Middle, and High) based on forecasted demand, resource potential, techno-economic parameters, and CO₂ emissions.

Why does Sierra Leone need a flexible electricity system?

Countries like Sierra Leone are also under political and economic pressure to restructure their energy sectors and reform their utilities, which have often failed to develop flexible electricity systems that can provide firms with a reliable supply and people with access to electricity.

What is the current state of energy in Sierra Leone?

The current state of Sierra Leone's energy sector is in acute need of improvement: 80% of Sierra Leoneans do not have access to electricity [1]. Of those that have access, 17% are connected to the grid and another 2-3% are connected to solar, mini-grid or portable home energy systems [ibid].

How can the energy sector improve in Sierra Leone?

For the energy sector in Sierra Leone to improve and meet these targets at the rate required, some transformative changes are needed. Robust and resilient solutions, acceptable to a range of different stakeholders, are needed across the energy sector.

How can we forecast the long-term electricity demand-supply situation in Sierra Leone?

This study focuses on forecasting the long-term electricity demand-supply situation in Sierra Leone by considering techno-economic and environmental parameters. Three case scenarios have been generated (Base, Middle, and High) that will cover the country's total electricity demand.

The National Renewable Energy Policy (NREP) of Sierra Leone and the ECOWAS Renewable Energy Policy (EREP) foresee the development of a National Renewable Energy Action Plan (NREAP) for Sierra Leone. The five-year rolling NREAP will contribute to the achievement of the regional EREP targets by 2020 and 2030. The NREAP is prepared in

Although many of the rivers investigated fall under the small to medium hydro system (i.e. 1 - 100 MW) there is a potential for pico to mini-hydro systems (5 kW to 1MW). ... The Ministry of Energy Sierra Leone has installed 8471 solar street lights in the fourteen district headquarter towns across the country. The facilities
