

How has the Slovak Republic improved its energy policy?

The latest review of the Slovak Republic's energy policies finds the country has made significant progress on several fronts. Along with its neighbours, and with support from the European Union, it has strengthened cross-border connections for electricity, natural gas and oil, improving its energy security and increasing market competition.

How is energy used in Slovak Republic?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

Does the Slovak Republic support natural gas?

ted to natural gas regarding meeting climate targets (Gas Package anticipated in 2020). From the point of view of electricity generation, the Slovak Republic promotes nuclear energy and also cost-effective RES with the aim of achieving the set targets by 2030 and thus also fu fill
