

For those of you who have the WatchPower related app Smart ESS for Voltronic type inverters (EG4, MPP, Sungoldpower, etc) there has been an update to the latter. It has improvements, i.e. when you look at the Analysis tab parameters like PV voltage, charging power, grid voltage, etc, it shows more precise time data as you scroll across the screen.

Smart ESS can store excess energy produced during peak times and release it during periods of low generation, effectively smoothing out fluctuations in renewable energy production and ensuring a reliable power supply. Demand Response and Load Shifting: Smart ESS can participate in demand response programs by adjusting energy consumption ...

The latest Smart String ESS has enhanced active protection to secure worry-free production every time. Equipment safety Real-time detection of each battery cell allows for an early warning and a rapid shutdown of the short-circuit battery pack, ...
