For South Africa: Solar Controller & Inverter Distributors. Thank you for your interest in Morningstar Corporation, the world's leading supplier of solar regulators/controllers and inverters since 1993. Morningstar designs and manufactures PWM charge regulators/controllers, MPPT regulators/controllers, and off-grid inverters for telecom, oil & gas, security, lighting, rural ...

A solar inverter in South Africa is a device that converts the direct current (DC) output from solar panels into alternating current (AC) electricity that can be used by homes and businesses. Solar panels produce DC electricity, which is then converted into AC by the inverter so that it can be used by electrical appliances or fed back into the ...

There may be times or periods where there is no load shedding, however solar is not just a tool to combat load shedding, it helps reduce the monthly energy bill. In 2023/2024 there was an estimated 18% price increase approved by Nersa, for 2024/2025 there is another 12% increase.

Hybrid inverters, which are the most common type of inverter used in South Africa, are a combination of a grid-tied and an off-grid inverter, and so they can be used for both applications. This technology also allows you to store excess solar energy in batteries, which then can be used during power outages or at night when there is no sun.

These inverters combine a solar inverter, MPPT Solar Charge Controller and battery inverter together with software which can be programmed to determine the most efficient use of your available energy. Having all the components in one simple plug and play unit means hybrid inverters are generally much lower cost and easier to install.
