

# Solar batteries comparison Puerto Rico

Does Puerto Rico use solar energy?

Puerto Rico has made some tremendous strides in solar energy exploitation in the last couple of years. Currently, the Island targets to attain 40% renewable energy by 2025 and 100% by 2050. Like most territories in the Caribbean Islands, Puerto Rico struggles to provide constant electricity via conventional sources.

How much money does Puerto Rico have to pay for solar?

Up to \$190 million is available to Puerto Rico's Housing Administration and a private company to pay for solar and battery installations in public housing common areas and subsidized, multifamily housing properties. Another \$175 million is available for certain healthcare and dialysis centers.

Why did Puerto Rico get a power outage?

The announcement comes as the U.S. territory continues to struggle with chronic power outages that have worsened since Hurricane Maria pummeled the island as a powerful Category 4 storm in 2017, razing the electric grid. The outages also are blamed on a lack of maintenance and investment in its electric grid for decades.
