

Solar batteries inia Bahamas

There will always be "cloud-covered days" with "too much risk and too much cost" involved in trying to rely on 100 percent solar and battery-powered microgrids, he said. But even if fossil fuels cannot be eliminated yet, solar and batteries can play a big role in cutting costs, reducing emissions and making island grids more resilient.

The Caribbean island nation of the Bahamas is turning to independent power producers (IPPs), the combination of "solar plus storage" and hybrid microgrids to extend sustainable energy access, improve energy reliability and resiliency, ...
