Take a look at the very first month in the list, November 2021. I didn't have solar at all that month, but my split between peak and off-peak usage was 54% in favour of peak. By using solar and a battery, the aim is to reduce both the total draw from the grid, and also skew that usage in favour of off-peak.

First: Make sure you have the right battery for your inverter, as it plays a critical role in its performance. Second: Place both the inverter and battery in a dry and well-ventilated area to prevent overheating and moisture damage. Third: Use your inverter regularly. This helps to keep the battery in good condition and extends its life.
