

Solar batteries, also known as solar energy storage systems or solar battery storage, are devices that store excess electricity generated by solar panels (photovoltaic or PV panels). They work in conjunction with a solar PV system to capture surplus energy produced during sunny days when the sun's power output is at its peak.

A solar battery allows you to store electricity produced by your solar panels and use it later or, in some cases, sell it back to the grid to make a few quid - but they're not cheap. Read on to see if it's worth getting a solar storage battery for your home...
