

Does Namibia have a big solar project?

Namibia has much larger solar and renewable energy development aspirations, as well. Both Namibia and neighboring Botswana are working with the World Economic Forum's (WEF) Global Future Council on Energy to develop a huge, five-gigawatt (GW) solar power project over the next two decades.

How will solar power benefit Namibia?

The generation of solar power will complement Namibia's available green energy portfolio, such as hydro-electricity, which already constitutes more than two-thirds of our installed power capacity. Electrifying key parts of our economy and of our neighbours will spur unprecedented economic activity and growth for Namibia and Southern Africa.

Does Namibia have a solar market?

Namibia is benefiting from the global expansion of the solar market, which is reducing costs and improving the efficiency of solar photovoltaic panels and related equipment. --Nampower General Manager Kahenge Haulofu was quoted in an African news service's report. Namibia has much larger solar and renewable energy development aspirations, as well.

Is Namibia a good country for solar?

The government recognises that Namibia is one of the best suited countries in the world for solar PV power generation and has a progressive national renewable energy policy. The key reason for this growth is that solar PV has become the cheapest source of electricity. Does Namibia have loadshedding?

Does solar water solutions support Namibia's mega-solar development partnership?

Solar Water Solutions isn't directly involved in the Namibian government's mega-solar development partnership with the WEF Global Council on Energy, but company CEO Antti Pohjola sees it as a very positive development that should ripple across Namibia's power and energy sectors and boost sustainable socioeconomic development nationwide.

Where is Namibia's First Solar power plant located?

Nampower just recently acquired the nation's first utility-scale solar power facility. Located in Mariental in the southern part of the country, Spain's Alten Energias Renovables and Nampower, with Namibia's Mangrove, Talyeni and First Place Investment contributed to the development of the 45.5-MW solar power plant.
