Where will a solar plant be built in Kosovo?

The solar plant is planned to be built in southwestern Kosovo and to come online next year. The CEO of KOSTT, Mustafa Hasani, left, and the director of Solar Energy Group Europe, Egbert Schnuse. Image: KOSTT

How much solar power does Kosovo have?

Kosovo had just 7 MW of installed PV capacity at the end of 2019, according to the International Renewable Energy Agency. The country recently raised its renewable energy target to an additional 400 MW of capacity by 2026. That would be enough to meet a quarter of its power demand and would reduce dependence on aging coal-fired power plants.

What will be used for grazing sheep in Kosovo?

The entire surface of the land where the project will be built will be used for grazing sheep, with the milk of which cheese specialties will be produced in cooperation with local producers in Kosovo and will be exported for a discount to the German-Austrian market.

Is Kosovo's feed-in tariff scheme complying with European state aid regulations?

In December, for example, Kosovo's State Aid Commission (KNSH) deliberated that the feed-in tariff scheme for PV installations not exceeding 3 MW in size, introduced by the country's Office of the Energy Regulator (ZRRE) in late November, was not complying with European state aid regulations.

The Transmission, System and Market Operator (KOSTT) of Kosovo* said its Chief Executive Officer Mustafa Hasani (pictured left) signed a deal on connecting a 150 MW photovoltaic plant to the grid with head of Solar Energy Group Europe Egbert Schnuse.

Landowners interested in leasing land to a solar developer should first do their homework. This includes retaining an experienced attorney before negotiating and signing a land lease. Solar lease rates vary per acre, depending on the size of the land, soil quality (i.e., lower price if the ground is low and wet), location and distance to

For commercial rooftop owners, we offer a Lease contract. Together these are known as site host agreements. An executed site host agreement with a property owner is the first of a series of steps to successfully build a solar farm. From there we manage the work and fund the process to design, develop and construct a solar farm on the site.

Solar farm leasing companies Kosovo

Solar farm leases typically range from 20 to 40 years total. Once you sign the solar lease agreement, or option to lease, there are generally four phases to a solar farm project: Development Phase (sometimes referred to as the Option Period) - This could take anywhere from 1 to 5 years. It will include planning, permitting and regulatory matters.
