

Is there electricity in St Vincent & Grenadines?

There is a hybrid system used on the island to produce electricity. VINLEC uses diesel engines to generate electricity and there is also a solar photovoltaic (PV) and Battery Storage system which was installed in 2019. We own and operate power plants of the island in St Vincent & Grenadines.

Where can I get solar power in St Vincent?

The Cane Hall Engineering Complex, located a few meters away, houses some solar systems which have a total PV capacity of 224 kWp. Lowmans Bay The Lowmans Bay Power Plant is the Company's modern state of the art facility. It has a capacity of 17.4 Mega Watts and provides approximately 60% of all power generated on mainland St. Vincent.

Who owns power plants in St Vincent?

Power Stations VINLEC owns and operates Power Plants on the islands of St. Vincent, Bequia, Union Island, Canouan and Mayreau. The system on mainland St. Vincent system has both diesel and hydroelectric generating stations.

Is Saint Vincent and the Grenadines dependent on fossil fuels?

ST. VINCENT AND THE GRENADINES ON A PATH OF RENEWABLE ENERGY DEVELOPMENT  
Caribbean small island states such as Saint Vincent and the Grenadines (SVG) is almost entirely dependent on fossil fuel for electricity production. This dependency has created major concerns for the sustainability of our economies and environment.

Do I need a voltage converter in Saint Vincent and the Grenadines?

As voltage can differ from country to country, you may need to use a voltage converter or transformer whilst in Saint Vincent and the Grenadines. If the frequency is different, the normal operation of an electrical appliance may also be affected. For example, a 50Hz clock may run faster on a 60Hz electricity supply.

How much power does St Vincent have?

It has a capacity of 17.4 Mega Watts and provides approximately 60% of all power generated on mainland St. Vincent. The ground breaking ceremony for this facility took place in 2005 and the plant was officially handed to VINLEC in February of 2007. The Plant also houses a small solar PV farm which was officially commissioned 2014.

A photovoltaic system will be added to the generation mix on Union Island in keeping with a mandate by the Government of St Vincent and the Grenadines (SVG) and St Vincent Electricity Services Limited (VINLEC) to ...

The project is historic for St. Vincent and the Grenadines. It is VINLEC's first solar and battery storage project and could provide a replicable model for the region, where in ...

A wet day is one with at least 0.04 inches of liquid or liquid-equivalent precipitation. The chance of wet days in Saint Vincent and the Grenadines varies significantly throughout the year. The wetter season lasts 6.1 months, from May 29 to December 2, with a greater than 22% chance of a given day being a wet day. The month with the most wet days in Saint Vincent and the Grenadines is ...

The battery storage system will help Mustique to increase the contribution of solar energy on the island and to reduce its carbon footprint. Mustique has the goal to increase renewable share to over 75% by 2024 and reduce the emissions by 22% by 2025, in line with St. Vincent & The Grenadines' commitment to the Paris Climate Agreement.

The formation of St. Vincent Electricity Services Limited (VINLEC) in 1961 set the pace for developing the electricity sector in the country. During the early 1970s, St. Vincent and the Grenadines government acquired 49% shares, while 51% remained with the CDC.

The Commissioning of the Union Island Solar PV and Battery Energy Storage System on Monday 25th March 2019 has been hailed as a significant milestone in the energy sector of Saint Vincent and the Grenadines.

The Caribbean Development Bank has approved financing of \$8.6 million to St Vincent Electricity Services Ltd (Vinlec) for the supply and installation of solar photovoltaic (PV) systems at company buildings in the ...

The month of January in Saint Vincent and the Grenadines experiences essentially constant cloud cover, with the percentage of time that the sky is overcast or mostly cloudy remaining about 47% throughout the month. The lowest chance of overcast or mostly cloudy conditions is 46% on January 14.. The clearest day of the month is January 14, with clear, mostly clear, or partly ...
