Solar's method allows to identify the potential of events that can occur to a person during his solar year. Similarly, if necessary, you can identify events that can not happen, and exclude them from further consideration. In fact, Solyar ...

On Thursday July 16, the Caribbean Development Bank" (CDB) Board of Directors approved a USD2.341 million loan to finance the installation and commissioning of a 1 Megawatt Solar Pholtovoltaic Plant at Corito, which will enable the Anguilla Electricity Company Limited (ANGLEC) to introduce renewable energy into the energy mix for electricity production.

The solar PV plant is CDB's sixth intervention in the energy sector in Anguilla, and supports the Government of Anguilla's goal of transforming the country into a low carbon economy. The country has set a national target of producing 30 percent of its electricity from renewable sources by 2030 and cutting greenhouse gas emissions.
