

How much solar power does Austria have?

As of the end of 2022, solar power in Austria amounted to nearly 3.8 gigawatt (GW) of cumulative photovoltaic (PV) capacity, with the energy source producing 4.2% of the nation's electricity.

What is Austria's 'integrated grid infrastructure plan'?

An Austrian national "integrated grid infrastructure plan" is currently (mid 2023) available for review and comments. In order to achieve this target, the value for 2030 was also raised and now stands at 21 TWh, means that an average annual installation rate of around 2 GW must be ensured until 2040.

Which country has the largest solar power station?

In September, 2011, Austria's largest solar power station, 2 MW, was under construction in the Niedere Tauern mountain range. Austria has also a large capacity of solar heating at its disposal. With more than 3,500 MW thermal the country ranks second in the EU, only behind much larger Germany.
