Using a solar battery can help users to reduce the amount of electricity they would normally buy during peak hours. The battery can store the extra energy produced from solar panels during the day to avoid using electricity at a more expensive rate. The peak time-of-use (TOU) rates can be double the price compared to off-peak rates.

The standard approach for estimating the potential deployment of solar energy in a city is to assess the number of square meters (m²) suitable for the installation of rooftop PV solar panels. However, this study follows a
