The most commonly referred-to tiers are Tier 1, Tier 2, and Tier 3. Here's an overview of the differences between these tiers. Tier 1 Panels: Tier 1 panels are considered to be of the highest quality and reliability. These panels are manufactured by well-established companies that have a strong track record in the solar industry.

When it comes to choosing the most ideal solar panels, the common fallacy that Tier 1 means excellent quality is deceiving. There's no denying Tier 1 is a good place to begin when selecting your brand of solar panel, however not all Tier 1 panels are made equal. To start, let's take a closer look at some of the important characteristics of a Tier 1 solar panel.

Solar Panels. Generating your own solar energy is a great way to save on ever increasing energy bills and reduce your carbon footprint. At Manchester Renewables we provide a wide range of Solar PV systems. Catering for everyone's budget. Battery Storage. The Battery Storage allows you to store the excess energy your system is producing.

The Tier 1 solar manufacturers will in most honour the warranty, and give you a new product if problems arise. Are there any downsides to Tier 1 solar panels? Although Tier 1 solar panels are considered the best, they are also the most expensive. In many cases, they will cost 30% more than other solar panels. So, if your budget is limited, the ...
