SOLAR CONSERVATION ENERGY EFFICIENCY WEATHERIZATION ABOUT GUAM ENERGY OFFICE The Guam Energy Office is committed to promoting energy efficiency, providing energy-saving solutions, partnering with others to deploy renewable technologies, and helping to reduce green-house emissions and protect the environment. **INSIDE THIS ISSUE**

Solar energy is a form of renewable energy, in which sunlight is turned into electricity, heat, or other forms of energy we can use is a "carbon-free" energy source that, once built, produces none of the greenhouse gas emissions that are driving climate change. Solar is the fastest-growing energy source in the world, adding 270 terawatt-hours of new electricity ...

In the quest for a sustainable future, the importance of power electronics in renewable energy systems cannot be overstated. The intermittent nature of renewable energy sources such as solar and wind, combined with the need for energy storage and efficient energy conversion, makes power electronics the unsung heroes of the renewable energy sector.

This program enables qualified households to access solar, undergo energy audits, and switch to energy-efficient equipment, all of which result in lower costs for low to moderate-income households in Guam." "Solar For All is a transformative opportunity for our island to accelerate its transition to a thriving green economy.

Renewable Energy Projects Large-scale renewable energy development on Guam has been limited to date, with no operational utility-scale facilities. However, two projects are currently in development to provide 35 MW of renewable energy under Phase I of GPA's Renewable Energy Acquisition Program. The first project

Solar panels need humans to install them; wind farms need technicians for maintenance. This means that, on average, more jobs are created for each unit of electricity generated from renewable sources than from fossil fuels. Renewable energy already supports thousands of jobs in the United States.

Hagåtña, Guam - The Leon Guerrero-Tenorio Administration is proud to announce the latest award of \$1.6 million from the Energy Efficiency and Conservation Block Grant (EECBG) Program, a significant funding opportunity administered by the Office of State and Community Energy Programs (SCEP) at the U.S. Department of Energy (DOE).
