The 1,119MW of solar energy currently installed in New Jersey ranks the state third in the country in installed solar capacity. That is enough solar energy to power 160,000 homes! In 2012 \$1.3 billion was invested in New Jersey to install solar on homes and businesses. That" an increase of ...

Solar power systems are clean and non polluting. New Jersey now generates more of its energy from solar power than from nuclear power plants. Solar is safer, cleaner and less expensive than dirty sources of power. We no longer need to destroy our environment with dirty sources of energy like nuclear and fossil fuels. We can now choose better.

Harness the power of the sun with this 400-Watts solar panel kit, featuring four 100-Watt monocrystalline panels for reliable, off-grid energy. Perfect for homes, RVs, boats, farms, or camping setups, this solar kit provides efficient and ...

Jersey City incentives and rebates. Solar incentives and rebates can cut the cost of installing solar in Jersey City by thousands of dollars. The most significant incentive is the 30% federal solar tax credit, available to any taxpayer in the country when they purchase solar panels or battery storage. Some cities, counties, states and utility companies offer additional solar incentives, ...

Solar panel costs come down, but batteries don't. The life of a system before component replacement is 10 years. You are replacing panels AND batteries. Over all, it's more expensive than PSEG. And if there's a storm, you're stuck paying out to fix or replace the system. PSEG, it's free. Also, solar panels are highly toxic when thrown away.

The New Jersey Department of Environmental Protection (NJDEP) has granted the first-ever permit for solar panel recycling to Commercial Solar Panel Recycling, located in Phillipsburg's Urban Enterprise Zone (UEZ). "New Jersey, as a national leader in renewable energy, has a responsibility to ...
