What is solar for Samoa?

The Solar for Samoa project set the benchmark for quality solar power projects in the South Pacific. The two sites will provide up to 27% of the network power during peak output. MPower has successfully delivered a wide range of renewable and conventional power systems across the region.

Does Samoa have a solar power station?

MPower was awarded a contract to deliver a fully operational 5.0MW solar power station across two sites in Samoa. The first site at Faleolo International airport has a 3MWp solar PV ground mount system. The second site at Faleata Race Track has a 2MWp solar PV group mount system.

Who managed the Solar for Samoa project?

The project was managed by MPower's construction manager, project manager and HSE managers and carried out by local staff (peaking at 220) in Samoa with regular visits from MPower's team in Sydney. The Solar for Samoa project set the benchmark for quality solar power projects in the South Pacific.

How many people use EPC electricity in Samoa?

As mandated to generate, distribute and sell electricity supply to all of Samoa, the EPC has connected up to 99% of Samoa's population. EPC has on record a total of 39,033 customers, using postpaid and prepaid electricity.

What has the EPC done for Samoa?

To date, works continue for further developments of its existing generation and distribution network. As mandated to generate, distribute and sell electricity supply to all of Samoa, the EPC has connected up to 99% of Samoa's population. Increased access by all people of Samoa, to quality and affordable electricity supply.

A new wind energy project will add another 25MW of renewables capacity to the island nation of Samoa - and 500kW of solar power has also recently been brought online. On Monday, a Power Purchase Agreement (PPA) between Samoa's Electric Power Corporation (EPC) and local company Pacific Renewable Energy Ltd. was signed.

Founded in 1989, Tata Power Solar, a subsidiary of Tata Power, says it is India's largest integrated solar company, manufacturing solar cells and modules, rooftop solar panels and solar water pumps. The company provides solar power to 13 state utilities in India, and it has shipped more than 3 gigawatts of solar modules worldwide.

Tesla has announced their solar panels are nearly entirely powering the island of Ta'u in American Samoa. The island used to depend entirely on imported diesel fuel for its electricity, but a new initiative has seen the islanders build a 1.4-megawatt microgrid that absorbs and stores solar power for all their energy needs.
