

Is solar power possible in Belarus?

In terms of global horizontal irradiation (GHI) and direct normal irradiation (DNI), most of Belarus receives only 1 100 kilowatt hours per square metre (kWh/m²) to 1 400 kWh/m² of GHI, and around 1 000 kWh/m² of DNI. This means that concentrated solar power (CSP) generation is impractical, but production by means of solar PV is possible.

How to register a foreigner in Belarus?

Electronic registration of foreigners is carried out through the unified portal for electronic services (portal.gov.by) free of charge. This administrative procedure is available for foreigners who entered the Republic of Belarus crossing points of the state border of the Republic of Belarus.

Are there hydropower resources in Belarus?

Hydropower resources in Belarus are deemed scarce, though there are opportunities for small hydro in the northern and central parts of the country. Total hydropower potential is estimated at 850 MW, including technically available potential of 520 MW and economically viable potential of 250 MW (0.44 Mtoe/year).

Does Belarus have a geothermal potential?

Belarus's geothermal potential is relatively undiscovered, with only a few regions having been tested. Of the tested regions, the most promising geothermal energy potential lies in the Pripyat Trough (Gomel region) and the Podlasie-Brest Depression (Brest region), in dozens of abandoned deep wells.

Which technologies are deployed in Belarus?

All technologies currently deployed in Belarus are mature and have commercial status. The technology with the most mature local market is biomass, currently used mainly in heat generation.

How do foreigners get citizenship in Belarus?

Foreigners arriving in the Republic of Belarus through the state border with the Russian Federation should apply in person to the citizenship and migration unit of the internal affairs body at their place of residence in Belarus for registration.
