

# Solar system in Jordan

What is the solar energy potential in Jordan?

The solar energy potential in Jordan is enormous as it lies within the solar belt of the world with average solar radiation ranging between 5 and 7 KWh/m<sup>2</sup>, which implies a potential of at least 1000GWh per year annually. Solar energy, like other forms of alternative energy, remains underutilized in Jordan.

Is Jordan a solar country?

Jordan lies within the solar belt of the world with average solar radiation ranging between 5 and 7 kilowatt-hour (kWh) per square metre. Decentralized generation from photovoltaic systems in rural and remote villages is currently used for lighting, water pumping and other social services of up to 1000 kW of peak capacity.

Who is Solarity Jordan?

complete information about products. so that you don't miss any news! Solarity Jordan is a distributor and solutions provider of photovoltaic (PV) systems offering a complete assortment of solar modules and inverters.

Why is solar energy important in Jordan?

Electricity demand in Jordan plays a significant role in the high amount of energy consumption to cover the needs of heating, cooling, lighting, etc. For that, the availability of the solar radiation information becomes essential to help in the design and building of the solar energy application.

Does Jordan have a solar water heating system?

There is usage of decentralized PV systems in rural villages. Nearly 15% of all households in Jordan have solar water heating systems and in the Energy Master Plan, the government set a goal for 30% of all households to be equipped with a solar water heating system [81 ].

What is the biggest solar power plant in Jordan?

In October 2016, Jordan signed a power purchase agreement with Masdar, a clean energy developer based in Abu Dhabi, UAE to build the biggest single solar installation in the country, Baynouna Solar Power Plant, with a 200 MW capacity.
