According to GlobalData, solar PV accounted for 3% of Argentina's total installed power generation capacity and 2% of total power generation in 2023. GlobalData uses proprietary data and analytics to provide a complete picture of this market in its Argentina Solar PV Analysis: Market Outlook to 2035 report. Buy the report [here](#).

La incidencia solar en Argentina es excelente en la mayoría de las regiones del país. Debido a su ubicación en el hemisferio sur, Argentina recibe una gran cantidad de radiación solar durante todo el año. En general, las regiones más al sur, como Patagonia, reciben menos radiación solar debido a la presencia de nubes y la menor inclinación del sol en el cielo.

A home storage unit also enables you to use self-generated solar power at night. Another factor in favour of investing in a solar battery is that it provides electricity during a blackout. Note, however, that not all storage systems can be recharged while operating in backup power mode.

A brief outline of Argentina's solar market outlook. Argentina is arguably one of the most interesting solar markets at the moment. The South American nation's solar sector has grown by leaps and bounds over the last three years. By the end of 2020, it had an installed solar capacity of 759 Megawatts.

So, even though Bid 3 has the highest price tag, at \$3.96 per Watt it provides the best bang for your buck. Today, solar systems typically cost between \$3-4 per Watt, and the cost per Watt drops as the size of the system increases.
