

What is French Polynesia's energy transition plan?

French Polynesia's energy transition plan has three main objectives: Change the energy model, by gradually replacing the use of fossil fuels with renewable energies in all activities

Does French Polynesia rely on hydrocarbons?

French Polynesia, like most island territories, is highly dependent on hydrocarbon imports. In 2019, 93.8% of energy consumed in the archipelagos came from imports of various petroleum-based fuels. The renewable energy penetration rate in power generation stood at 28.78% in 2019. This figure has remained stable over the last five years.

How is electricity produced in French Polynesia?

Electricity production in French Polynesia is still heavily dependent on fossil fuels despite the development of renewable energy sources (REn). Electricity production and consumption are unevenly distributed over the territory as they are correlated with the geo- graphical distribution of the population.

Is biomass a source of electricity in French Polynesia?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. French Polynesia: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

What is PEC in French Polynesia?

In French Polynesia, mainly crude oil and its derivatives, hydraulic power and solar radiation PEC is expressed in tonnes of oil equivalent (toe), unit that allows the different energies to be compared in relation to their intrinsic characteristics. litres of hydrocarbons were imported in 2019 in French Polynesia. is the dependency rate.

What is energy production in Tahiti?

is the production of electricity of net thermal origin related to the combustion of fuel oil for Tahiti and diesel in the islands. energies in the electricity mix, thanks in particular to the production of hydroelectricity and electricity from photovoltaic sources.

Environ 6% de l'énergie primaire en Polynésie française est produite à partir de sources d'énergies renouvelables en 2023. Environ 30 % de l'électricité est produite de manière renouvelable, principalement via une production d'énergie hydroélectrique et d'énergie solaire. La production d'énergie renouvelable est concentrée à Tahiti, tandis que d'autres parties de la Polynésie française dépendent presque entièrement des combustibles fossiles. L'énergie oléenne n'est p...

Possuamos um equipe multidisciplinar composta por engenheiros eletricistas, de energia, civil e de segurança no trabalho, a fim de atender todas as suas necessidades quando o assunto é geração de energia renovável.

Formed in 2014, Solaris Energy Infrastructure delivers reliable equipment and technology integrating proven energy solutions, in-house expertise and customer-centric service. We are a forward-thinking, growth-oriented company that offer turnkey solutions to traditional challenges that deliver results project after project.

French Polynesia, like most island territories, is highly dependent on hydrocarbon imports. In 2019, 93.8% of energy consumed in the archipelagos came from imports of various petroleum-based fuels. The renewable energy penetration rate in power generation stood at 28.78% in 2019. This figure has remained stable over the last five years.

With all of our Officers and Managers possessing over twenty years of experience in the Solar and Construction industries, Solaris Energy can guarantee our customers a professional, experienced, and efficient service. Our company has worked with the leading Photo Voltaic Energy Providers in the solar Industry.
