

Solomon Islands solution power partner

How does the World Bank support Solomon Islands?

The World Bank is currently committing more than US\$196 million in active projects and support to Solomon Islands. In addition to the Tina River Hydro Project, this includes a further US\$19 million to improve access to renewable energy, as well as US\$51 million to improve roads and airports, and US\$25 million to supporting rural development.

Who is Solomon Partners?

Solomon Partners was the first private independent investment banking firm created to incorporate the ethos and culture of the traditional investment banks with the entrepreneurial spirit of a collective partnership. For over three decades, we have served as a trusted advisor on a number of sector-defining transactions.

How much is the Solomon Islands infrastructure project worth?

The financing package for the project, worth over US\$200 million, through loans and grants from six institutions, marks the first large-scale infrastructure project for Solomon Islands to be developed as a public-private partnership (PPP).

How many electricians live in Solomon Islands?

Further complicating matters, in 2016 only 60 licensed electricians lived in the country and all resided in the capital, Honiara. While the World Bank has invested significantly in sustainable energy programs in Solomon Islands, particularly in hydropower and clean energy access, many challenges still remain.

Does Solomon power have RBF?

Additionally, Solomon Power has incorporated an RBF component into their connection drive. This ensures the transformative work of providing access to reliable power for households, schools, health centers and micro-enterprises will go on. Innovative approaches like RBF are advancing global development and Solomon Islands is just the beginning.

How many households are connected to the electrical grid in Solomon Islands?

In Solomon Islands, only 16% of households are connected to the electrical grid. The low level of electrification in Solomon Islands is due to systemic, economic, and geographic barriers to expanding the grid.
