

Solution for solar panels France

Are solar panels a good investment in France?

As electricity prices continue to soar in France - up 60% in four years - more people are turning towards solar panel kits, which promise to help users save on energy costs and installation prices. The estimated extra cost of electricity in 2024, compared to 2020, is EUR540 per household per year.

Are solar panels a good alternative to gas?

This, coupled with rising energy costs, continues to make solar panels appear an attractive alternative to gas or electric energy sources, for both homeowners and businesses. Here we answer eight common queries about solar panel installation in France. What types of solar panels are available?

How much do solar panels cost?

It can range from EUR1,290 to EUR9,000 depending on the size of the installation, and is usually paid out in instalments over five years. For solar thermal panels you may be able to obtain an 'Energy Savings Certificate bonus' (Prime des Certificats d'Économies d'Énergie, or CEE).

Can you sell surplus energy if you have solar panels?

For example, you can only sell surplus energy if you have photovoltaic panels installed, as solar thermal panels do not directly produce electricity. Installation types can vary between off-grid and on-grid systems, and while some installations are on the roof, others will be on the ground in your garden.

What is carbon & how can it help reindustrialize France & Europe?

CARBON, a French start-up with a European presence, brings together an unprecedented coalition of entrepreneurs, industrial operators, and solar professionals. Its ultimate goal is to sustainably reindustrialize France and Europe by building a large-scale industrial solution for the solar sector. Our project?
