

Can solar power be used in Somalia?

A case study on a solar power microgrid system in Bacadweyene, Somalia, is also presented. The research provides valuable information on the status of the utilization and potential of solar energy in Somalia and aligns with the NDP 9th.

How can BECO's new solar power plant help Somalia?

Because Somalia struggles with a lack of electricity and high electric costs, BECO's new solar power plant has the potential to positively impact many people's lives. When it opened, the power plant had the capacity to produce 8 MW.

How much energy does Somalia have?

Somalia's energy capacity is around 344 MW, mainly generated from imported diesel fuel. However, some ESPs have installed grid-connected solar PV systems. In Table 3, Energy supply and tariffs in the Federal Member States have seen a 36% yearly increase in the past six years.

Why is solar energy important in Somalia?

Solar energy was competitively pursued with conventional energy sources in Somalia. Moreover, solar energy significantly contributes to national power generation and reduces the environmental effect of fossil fuels.

Which companies invest in solar energy in Somalia?

Since 2015, the most significant investment in solar energy in Somalia has been produced by leading ESPs. The companies, which include BECO, NESCOM, and Sompower, have invested in the solar system project in different capacities, with BECO producing the most significant investment in the Somali energy sector.

Is solar energy sound in Somalia?

The average yearly irradiation for 11 years of Somalia was obtained in terms of maximum radiation in Bari and minimum radiation in the Middle Juba region. Therefore, the data demonstrated that solar radiation is typically sound within Somali territory. Fig. 7. Diagram indicating the potential of solar energy based on the map of Somalia [51,59].
