

# Somalia om energy solution

What is the energy sector like in Somalia?

Somalia's energy sector is considered promising for growth and investment. Small and medium-sized private sector companies are the main providers of electricity generation and distribution, primarily running diesel powered systems through off-grid networks.

Where can I find information about energy access in Somalia?

Find relevant information for Somalia on energy access (access to electricity, access to clean cooking, renewable energy and energy efficiency) on the Tracking SDG7 homepage. (Sustainable Development Goal indicators 7.1 energy access, 7.2 on renewable energy and 7.3 on energy efficiency).

Does Somalia have solar energy?

Solar Energy: Somalia has high renewable energy potential. Solar power could generate an excess of 2,000 kWh if the country reached its full capacity. Recently there has been progress in developing solar energy systems in the country by private sector electricity companies.

Which companies provide off-grid solar energy solutions in Somalia?

In addition, several other companies exist that provide off-grid solar energy solutions, including Blue Sky, Solargen, Delta, and others. Financing represents the biggest obstacle to Somalia realizing its potential as a hub for renewable energy. International development partners are providing support in the solar energy sector.

Who generates electricity in Somalia?

Small and medium-sized private sector companies are the main providers of electricity generation and distribution, primarily running diesel powered systems through off-grid networks. Private Somali companies generate approximately 128MW; most companies generate and distribute electricity independently.

How much does electricity cost in Somalia?

Regarding costs per kilowatt-hour of electricity, Somalia has one of the highest unit prices in Africa. Somalia has higher tariffs than neighboring countries Kenya and Ethiopia, ranging from 50-125 cents/kWh compared to 0.15 cents/kWh in Kenya and 0.6 cents/kWh in Ethiopia. Somalia's energy sector is considered promising for growth and investment.

Somalia: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO<sub>2</sub> - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.
