The update requires a manual reset code, which must be entered into the pre-paid meter in the same way as normal recharge codes. Unless people enter the new reset code, their prepaid electricity meter will stop working on 24 November 2024. The problem is linked to the tokens prepaid meters in South Africa used to load credits.

This decrease has, for the very first time, put energy storage in the realm of economic viability for Brazilian consumers. Thanks to this gain in competitiveness, the first commercial behind-the-meter systems have been implemented throughout 2018 and 2019. Behind-the-meter energy storage systems can address a wide variety of purposes.
