Grenadines although the overall economic decline was relatively moderate at 2.7%. The country recorded its first case of the virus on March 13, 2020.

The mainland of St. Vincent is volcanic and features a lot of black sand beaches, whereas in the Grenadines we have the stunning contrast of coral islands with pristine white sand beaches. One of the things that people don't realise about black sand beaches, especially where the waves break, is that on a sunny day, the water is clearer than ...

In St. Vincent and the Grenadines, high mountain ranges and dense forests ensure a water supply that is as pure as possible. The country's lone water provider, the Central Water and Sewerage Authority(CWSA), has over the years managed to build a purely gravity-fed infrastructure, which means pumps are not required in its distribution process. ...
