

Could large solar farms in the Sahara Desert redistribute solar power?

Large solar farms in the Sahara Desert could redistribute solar power generation potential locally as well as globally through disturbance of large-scale atmospheric teleconnections, according to simulations with an Earth system model.

Is natural resource exploitation a problem in Western Sahara?

As the issue of natural resource exploitation in Western Sahara has been conceptualised in very different ways and from the perspectives of a variety of disciplines, the authors have opted for a semi-systematic review of the work done encompassing academic, non-academic, and activist backgrounds.

Is Morocco dependent on Western Sahara for its energy supply?

But these developments have made Morocco partly dependent on Western Sahara for its energy supply. Morocco already gets 18% of its installed wind capacity and 15% of its solar from the occupied territory, and by 2030 that could increase to almost half of its wind and up to a third of its solar.

What is Western Sahara resource watch (WSRW)?

Western Sahara Resource Watch (WSRW), an NGO registered in Belgium, has been the most prolific in terms of publications in this area. We first review WSRW's body of work, then move on to look at research by other NGOs, then finally we review non-fiction book chapters and monographs.

How interdisciplinary is research on natural resource exploitation in Western Sahara?

The production of research on natural resource exploitation in Western Sahara is accelerating. Yet this field remains interdisciplinary, and the work is carried out by researchers from academic, non-academic, and activist backgrounds, with sometimes very different aims and envisaged audiences.

Is Western Sahara an interdisciplinary field?

"Western Sahara, Resources, and International Accountability." *Global Change, Peace and Security* 27 (3): 285-299. The production of research on natural resource exploitation in Western Sahara is accelerating. Yet this field remains interdisciplinary, and the work is carried out by researchers from academic, no...

The Sahara Desert, spanning over 9.2 million square kilometers across North Africa, is the world's largest hot desert. Its vast expanse and abundant sunlight make it an ideal location for solar power generation. The region's solar potential could provide clean, sustainable energy for local consumption and meet growing energy demands in neighboring countries and beyond.

The X-Series lineup of vocational trucks was created with Truck Equipment Manufacturers (TEMs) in mind. We designed the truck to ease body upfit for every type of truck including dump trucks, concrete mixers, and crane trucks, ...

The Western Sahara dispute, now in its fourth decade, appears to be a forgotten and frozen conflict. In reality, the conflict and its perpetual irresolution are central to the ways ...

The Kingdom of Morocco has long used money and its military to exert control over Western Sahara. According to Transparency International, a nonprofit focused on combating global corruption, the nation has spent more than \$862 billion on infrastructure, military, and unemployment benefits in Western Sahara.

One of Africa's longest wars shifted toward a conclusion in July when France recognized Morocco's claim of sovereignty over the Western Sahara. That action, alongside Morocco's military advantage, effectively will ...
