

Sun command solar panels Italy

What is a sun command solar panel system?

The Sun Command solar panel system is an efficient collector of the free energy available from the sun. The panels are mounted onto the roof of your home, or other suitable structure, and clean filtered water is passed through the panels during the day time, by means of your existing pool pump.

What are Sun command pool heating solar panels?

Sun Command pool heating solar panels are the epitome of energy-efficient pool heating solutions. By harnessing the power of the sun, these panels provide unparalleled benefits, from substantial energy savings to environmental stewardship.

How do Sun command panels work?

How Sun Command Panels Work Absorption and Circulation: Sun Command panels are designed with a high-efficiency collector surface that absorbs sunlight and converts it into heat. The heated water is then circulated back into your pool, raising the overall temperature.

How much water can a sun command solar panel handle?

As a rule one 3m x 1.25m sun command solar panel can handle 10000l of swimming pool water. Sun Command solar panel 2m x 1.25m Sun Command solar panel 2.5m x 1.25m Sun Command solar panel 3m x 1.25m Please note that this price only includes a single panel without any fittings or installation material

How long does it take to install a solar panel?

Our Solar Panels are installed in less than 1 day by one of Lex Pools supervised installation teams. The Sun Command solar panel system is an efficient collector of the free energy available from the sun.

Are heliocol solar panels quality?

Our quality solar panels are manufactured from UV stabilised polypropylene. Heliocol is also the only solar system certified with ISO 14001, which is more stringent and meets not only quality control standards, but environmental standards.
