

Is Cameroon a good place to invest in solar power plants?

The good levels of solar irradiation in some parts of the country are favorable for the development of solar PV power plants. Cameroon has as principal objective the attainment of an annual GDP of 6.1% by 2035 as stated in the Growth and Employment Strategy Paper (GESP) (Power Africa, 2019).

What is the financing structure for solar power generation in Cameroon?

The financing structure is sharply unbalanced. The financing of solar PV power generation in Cameroon comes mostly from public-private partnerships (PPP) and accounts for more than 97.89% of total investment in the sector.

Who is responsible for promoting PV power generation in Cameroon?

Although Cameroon has formulated a basic policy aimed at promoting PV power generation in its long-term renewable energy development plan, it has not clearly defined which department is responsible for promoting the exploitation of solar energy resources, notably PV power.

Where is solar energy stored in Cameroon?

Cameroon is located in the center of the Central African tropics. It is an ideal place to capture and store solar radiation. About 10 trillion kWh of solar energy reaches the surface of Cameroon every year (Hermann et al., 2014). If 0.02% of this is converted into electric energy, it can make up the power supply gap.

Does Cameroon have solar energy?

Cameroon is located in Central Africa and, similar to other countries in this region, it has enormous solar energy resources from which electricity could be generated. The average solar radiation potential in the country ranges from 4.5 kWh/m²/day in the southern region to about 5.7 kWh/m²/h in the northern regions (Abanda, 2012).

Does Cameroon's investment and financing meet its photovoltaic power generation needs?

Through in-depth analyses of the investment and financing data of photovoltaic power generation from Cameroon, reference countries and the world during 2008-2019 and by drawing lessons from international experiences, we find that Cameroon's investment and financing is far from meeting the needs of its photovoltaic power generation development.
