

Sustain energy group Samoa

Who is sustaingroup?

SustainGroup will become the leading African supplier of clean energy solutions for sustainable power generation from biogas, landfill gas, natural gas and other sustainable and alternative energy sources such as solar and wind. © 2024 Sustainable Energy Group. All Rights Reserved | Website by Shift One

What makes sustaingroup different from sustainpower?

The SustainGroup's brands integrate complex, clean energy technology in rugged packages, ensure turn-key delivery and provide operations and service supported by financing solutions. SustainPower provides innovative and sustainable energy solutions that empower businesses and communities.

Does American Samoa have a geothermal energy plan?

The 2016 American Samoa Energy Action Plan identifies some geothermal resources, but none of these are viable for commercial electricity generation. The 2016 plan instead emphasizes the development of wind and solar power (Ness, Haase, and Conrad 2016). American Samoa is exploring opportunities for both offshore and onshore wind power generation.

Where does American Samoa get fuel?

Fuel for American Samoa comes from Singapore with Busan, South Korea as an alternate provider if needed. In the case of fuel disruption, Pacific Energy prioritizes serving ASPA to ensure power and water treatment services are not interrupted (Pacific Energy representative, personal communication, August 9, 2023).

Why is Samoa launching a new electricity source?

The launching of a new electricity source that will benefit up to 5,000 families on the north-western side of the island of Upolu, is a milestone for Samoa's renewable energy efforts. It is also a significant contribution to the country's climate action commitments.

Does Samoa have an emergency energy conservation plan?

1979: The U.S. "Emergency Energy Conservation Act of 1979" requires the submission of an emergency energy conservation plan by each state or territory (Public Law 96-102, as amended). American Samoa adopted its Emergency Energy Conservation Plan in 1982 (see Chapter 5, Annex A of ASCA 12 for plan details).

Sustainable Solar Systems Pty (Ltd) "SustainSolar" is a subsidiary of the Sustainable Energy Group - a leading systems integrator specialised in high quality, turn-key containerised Solar PV, and battery energy storage systems (BESS). SustainSolar offers an innovative range of products consisting of modular, plug and play solutions suitable for ...

This will provide an assurance that anticipated sustainable energy solutions will be realised in the region.

This report describes a least-cost electricity generation plan for Samoa. It is intended to inform electricity sector planning decisions and describe the path toward achieving 100 per cent reliance on renewable electricity. Report was commissioned by New Zealand Ministry of Foreign Affairs and Trade as part of the Pacific Energy Summit.

At the Pacific Energy Summit held in Auckland in March 2013, the Government of Samoa (GoS) and the New Zealand Ministry of Foreign Affairs (NZ MFAT) decided to work in partnership to increase the generation of energy in Samoa from renewable sources. The goal is to have an efficient, reliable, safe, affordable and sustainable electricity supply for Samoa.

Sustainable Energy Africa promotes equitable, low carbon, clean energy development in urban South Africa and Africa. Through our work we promote energy efficiency, the transition to more sustainable energies such as solar and wind power and access to safe and affordable energy services for all. We do this through research, capacity building ...

This report describes a least-cost electricity generation plan for Samoa. It is intended to inform electricity sector planning decisions and describe the path toward achieving 100 per cent ...

This report responds to Activity 1.4 of CAP-IT, aiming to conduct a scoping and feasibility study on financial mechanisms to promote and sustain Samoa's low-carbon transition of the transport sector. With a focus on land and maritime transport, the study aligns with Samoa's commitment to gender equality and social inclusivity, emphasizing the need for just in the ...

The stability and affordability of power from the new Ta'u microgrid, operated by American Samoa Power Authority, provides energy independence for the nearly 600 residents of Ta'u. The battery system also allows the island to use stored solar energy at night, meaning renewable energy is available for use around the clock.
