Why do solar panels work in Isfjord Radio?

The solar panels also benefit from the "albedo" effect,the reflective power of snow and ice,as well as low temperatures that improve their efficiency. On the flipside,the region is plunged into total darkness from early October until mid-February, which makes it impossible for Isfjord Radio to completely give up fossil fuels.

Areas with more sunshine generally require fewer solar panels to meet energy needs compared to regions with less sun exposure. 4. Calculating the Number of Solar Panels.
