What happened to Suncor Energy in Syria?

****Canada's Suncor Energy Inc suspended its Syria operations in 2011. Its primary asset is the Ebla development located in the Central Syrian Gas Basin covering more than 300,000 acres (approximately 1,251 square kilometres). The gas field was producing 80 million cubic feet of natural gas per day.**

What type of energy is primarily used in Syria?

In Syria, most energy is based on oil and gas. Some energy infrastructure was damaged by the Syrian civil war. In the 2000s, Syria's electric power system struggled to meet the growing demands presented by an increasingly energy-hungry society.

Why is Syria reliant on Iran?

Syria's 13-year civil war crippled the country's energy sector, making it highly reliant on imports from Iran. Below are facts about Syria's energy sector. ****Syria has not exported oil since late 2011, when international sanctions came into force, and has become dependent on fuel imports from Iran to keep power supplies running.**

Why did a tanker carry Iranian oil to Syria?

LONDON, Dec 9 (Reuters) - A tanker carrying Iranian oil to Syria turned round in the Red Sea to head away from its original destination after the fall of Syrian President Bashar al-Assad. Syria's 13-year civil war crippled the country's energy sector, making it highly reliant on imports from Iran. Below are facts about Syria's energy sector.

How much oil does Syria produce a day?

****Prior to sanctions, Syria produced some 383,000 barrels per day (bpd) of oil and liquids, according to previous analysis by the U.S. Energy Information Administration (EIA). **Oil and liquid production fell to 40,000 bpd in 2023, according to separate estimates from the Energy Institute.**

Why is energy demand increasing in Syria?

Energy demand in Syria has been increasing at a rate of roughly 7.5% per year due to the expansion of the industrial and service sectors, the spread of energy-intensive home appliances, and state policies that encouraged wasteful energy practices, such as high subsidies and low tariffs.

(Bloomberg) --Fulcrum BioEnergy, a clean-fuels pioneer that raised more than \$1 billion to turn household waste into lower-emitting fuels for planes and trucks, is in danger of going under. The company recently laid off nearly all of its staff of about 100 and halted most of its operations, according to more than a half-dozen former employees.

Fulcrum LNG Inc. is a U.S.-based energy company founded by experienced and industry-recognized professionals with more than two centuries of combined experience. We partner with governments and companies to develop the necessary gas infrastructure to produce and sell natural gas and LNG, which we believe is a crucial resource to deliver reliable energy to the ...

Fulcrum was the first company to take shredded landfill waste, gasify it and then convert it into a liquid fuel. While technically challenging, garbage-to-fuels has long been tantalizing. That's because household waste is abundant and cheap, and it doesn't require additional acres for growing energy crops.
