

Why is Syria's energy sector in turmoil?

Syria's energy sector is in turmoil because of the ongoing civil conflict that began in the spring of 2011, with oil and natural gas production declining dramatically since then. Syria's energy sector has encountered a number of challenges as a result of conflict and subsequent sanctions imposed by the United States and the European Union.

Why did a tanker carry Iranian oil to Syria?

LONDON, Dec 9 (Reuters) - A tanker carrying Iranian oil to Syria turned round in the Red Sea to head away from its original destination after the fall of Syrian President Bashar al-Assad. Syria's 13-year civil war crippled the country's energy sector, making it highly reliant on imports from Iran. Below are facts about Syria's energy sector.

Why is Syria reliant on Iran?

Syria's 13-year civil war crippled the country's energy sector, making it highly reliant on imports from Iran. Below are facts about Syria's energy sector. \*\*Syria has not exported oil since late 2011, when international sanctions came into force, and has become dependent on fuel imports from Iran to keep power supplies running.

What type of energy is primarily used in Syria?

In Syria, most energy is based on oil and gas. Some energy infrastructure was damaged by the Syrian civil war. In the 2000s, Syria's electric power system struggled to meet the growing demands presented by an increasingly energy-hungry society.

What happened to Syria's oil & natural gas industry?

Syria, previously the eastern Mediterranean's leading oil and natural gas producer, has seen its production fall to a fraction of pre-conflict levels. Syria is no longer able to export oil, and as a result, government revenues from the energy sector have fallen significantly.

Does Syria have electricity?

Syria also had separate entities for the generation and distribution of electricity. Syria's oil sector has been in a state of disarray since 2011. Production and exports of crude oil have fallen to nearly zero, and the country is facing supply shortages of refined products.

The new name is TEXEL Energy Storage with focus on our new generation battery solution. The battery was developed in order to find a solution to store cheap energy for TEXEL's thermal solar technology, "The battery dish". However, the development process meant that TEXEL identified a battery storage solution that could compete on the same ...

Positive Environmental Impact of TEXEL's Green AI Solutions. Our Green AI technology is designed to drastically reduce carbon emissions and energy consumption through the efficient reuse of waste resources converting these resources into electricity and reusing the heat generated by AI servers, TEXEL minimizes the need for traditional electricity production and ...

Executive VP & CFO at TEXEL Energy Storage &#183; Experienced Chief Financial Officer with a demonstrated history of working in the renewables and environment industry. Skilled in Private Equity, Financial Reporting, Financial Modeling, Corporate Finance, and Due Diligence.
