Will the Netherlands host a new nuclear power plant by 2035?

The Netherlands will most likely host two brand-new nuclear power plants, based in the Zeeland village of Borssele by 2035. The project has broad support from the Dutch House of Representatives. The Dutch government will ultimately contribute to construction costs. So far, EUR5 billion has been allocated to kick-start the project, writes RTL Nieuws.

What role do power plants play in the Netherlands' energy transition?

The power plants need to play an important role in the country's energy transition, as the Netherlands aims to make its power production carbon neutral by 2040. The Netherlands derived 12% of its energy from sustainable sources last year.

There's been a nuclear power station in the area since 1973, meaning the space and infrastructure is already present for the two new plants. Although the project depends on local support to go ahead, the Dutch ...

Article source: Atelier van Berlo Former power plant transformed into the multi-tenant Innovation Powerhouse. A transformation from a pure, brute, raw and heavy industrial complex - in size and volume completely unsuitable for office use - into a comfortable, breathing, spacious, fresh and young work environment. Architects: Atelier van Berlo in collaboration with ...

OverviewHistoryDomestic production and importsNuclear policySee alsoResearchers in the Netherlands began studying nuclear energy in the 1930s and began the construction of research reactor at then Reactor Centrum Nederland (today Energy & Health Campus) in 1955. The researchers' goal was to introduce nuclear power technology by 1962 and reduce the need for fossil fuels.

The Borssele nuclear power plant was built by Siemens and has been operational since 1973. Originally it was built primarily to supply relatively cheap electricity to an aluminum smelting facility, opened by French concern Pechiney at a nearby site in 1971, that for many years used two-thirds of the output of the power plant. In 2006, the installation of a modern steam turbine ...

The Netherlands house power station

The government of the Netherlands has said it will consider acquiring a stake in the Borssele nuclear power plant should a decision be made to extend the operation of the single-unit plant beyond 2033.; ... the government will inform the House of Representatives about the next steps to be taken." The 482 MWe (net) pressurised water reactor at ...
