

The Netherlands unitech energy

Who is Unitech Energy Group?

UNITECH Energy Group is a leading supplier of subsea connector and distribution systems, umbilicals, power cables and flying leads. We help connect energy in a reliable, safe and sustainable way within our core areas of subsea Oil & Gas and Floating Wind projects. Covering global projects from our offices in Norway, Singapore, Australia and USA.

What are the new sources of energy in the Netherlands?

New sources are expected to include geothermal energy, surface waters, and data centers. In the Netherlands, 78% of enterprises have invested in reducing carbon emissions and mitigating the impact of weather disasters as of 2023. Six out of ten (60%) plan to invest in these areas during the next three years.

What types of energy contracts are available in the Netherlands?

There are typically three types of energy contracts available in the Netherlands: Fixed Energy Contract (vast energiecontract): This contract is for a fixed amount of time (one to five years), allowing consumers to lock in their energy rate.

How can consumers save money on energy costs in the Netherlands?

Consumers can save by using energy when prices are low but are also exposed to hourly price increases. Borssele is the only nuclear power station in the Netherlands and produces around 4 billion kilowatt hours (kWh) per annum, around 10% of electricity used in the Netherlands.

How can the Netherlands reduce its greenhouse emissions?

The Netherlands has set a target of 70% of electricity from renewable sources (mainly solar and wind power) by 2030. To reduce its greenhouse emissions, the government of the Netherlands is subsidizing a transition away from natural gas for all homes in the country by 2050.
