

Three energy solutions Togo

What are energy systems in Togo?

Energy systems in many countries, including Togo, are a balance between energy that's generated centrally at a large scale and energy that's generated at a smaller scale closer to where it's used. Balancing the two sources makes energy supply more reliable and stable.

Who is responsible for the energy sector in Togo?

Another important player in the energy sector is the Togolese Agency for Rural Electrification and Renewable Energies(AT2ER),a public institution,with financial autonomy. The agency is in charge of implementing the country's rural electrification policy,promoting and developing renewable energies.

What is Togo's energy strategy?

The electrification technologies and business model of Togo. The national Power grid, mini-grids for PPP and solar home systems (SHS) The national strategy is based on the most cost-effective approach for identify the technologies to be deployed on the territory.

What is the main source of energy in Togo?

Presently,the main source of energy in Togo is electricity. The rate of access to electricity in Togo is increasing (from 17% in 2000 to 45% in 2018),but with large differences between urban (access rate = 88.8%) and rural areas (access rate = 8%) (Energypedia 2020).

Does Togo have a competitive electricity market?

The electricity company of Togo remains the sole entity that can market the electricity generated and there is no competition in electricity markets that will create more competitive markets and reduce the price per unit.

How does energy consumption affect the economy in Togo?

Besides,its excessive consumption may sometimes lead to massive environmental pollution which takes a negative toll on the economy as illustrated by Qudrat-Ullah and Nevo (2021). Presently,the main source of energy in Togo is electricity.
