Kinetic energy is the energy associated with a body's motion, while potential energy is the energy due to an object's position. All the other types of energy (e.g., electrical energy, chemical energy, thermal energy, nuclear energy) have kinetic energy, potential energy, or a combination of the two.

Everything You Need. Nothing You Don't. Reduce costs and complexities of using multiple energy suppliers. World Kinect Energy Services can help determine the right energy mix and sourcing strategy and be your single-source provider of renewable and conventional electricity, natural gas, fuel, and lubricants at competitive prices.
