

# Tokelau siam solar power distribution

Can Tokelau support itself with solar energy?

Tokelau,an island nation in the South Pacific,is now completely able to support itself with solar energy. Elly Earls met Joseph Mayhew of the New Zealand Aid Programme to find out how this tiny collection of atolls has become almost 100% self-sufficient in less than 12 months.

How much electricity does a solar system provide in Tokelau?

Each system alone is among the largest off-grid solar power systems in the world,and together they are capable of providing 150%of current electricity demand in Tokelau,a much higher amount than the 90% that was originally planned for.

Could Tokelau be the world's first renewable nation?

Solar power plants and coconut biofuel-powered generators switched on in Tokelau has made the islands the world's first truly renewable nation.' Imagine a place where the only energy to be found is clean,reliable solar power. Solar Array's seen on the three tiny islands of Tokelau to completely produce solar power energy.

Where does Tokelau get its electricity from?

Except for that part of the electricity supply provided by Solar Photovoltaic (PV) to TeleTok facilities on all three atolls and the University of the South Pacific (USP) facility on Atafu,essentially all energy in Tokelau currently is from imported petroleum.

Is Tokelau the first country to use solar power?

Tokelau has become the first territory able to meet all its electricity needs with solar power, officials say. The South Pacific territory - comprising the three atolls of Atafu, Nukunonu and Fakaofu - had been dependent on diesel to generate electricity. New Zealand, which administers Tokelau, funded a \$7m (&#163;4.3m) solar project.

Why did Tokelau switch to solar?

Yet despite the challenges involved in installing comprehensive solar systems in such a remote location,switching to solar was absolutely crucial for the tiny collection of islands. &quot;Tokelau's atolls are low-lying and especially susceptible to the adverse effects of climate change,&quot; Mayhew stressed.
