

In an effort to address high energy production costs and increase the use of renewable sources, a delayed project to build Tunisia's first large-scale solar energy farm is now under way. The farm, set to be developed by UK firm TuNur, was approved in ...

The two projects support the government of Tunisia's goal of promoting energy efficiency and reducing reliance on imported energy through the development of renewable energy. Electricity generated from the projects will be sold to a state-owned enterprise, Sociéte Tunisienne de l'Electricité et du Gaz, under 20-year power purchase ...

Despite depending heavily on gas-fired electricity production, declining productivity at key fields and rising energy imports from Algeria have prompted Tunisia to turn to renewables. The ...

RES4Africa's survey analyses investment risk in renewable energy. Mohamed Boussaïd, minister of Industry, Energy and Mines: "Tunisia is determined to accelerate its energy transition over the next decade with a ...

Business on the Frontlines partnered with Apenco, a private Tunisian power and engineering company, to develop its strategy to best capitalize on renewable energy opportunities in ...

a) The Tunisian Solar Plan: a renewal of the trend towards dependency as strategic orientation In 2015, 7 Tunisia launched the updated version of the Tunisian Solar Plan (its French acronym is PST), an operational plan that sits within the country's energy transition strategy. The plan was originally published in 2009 and aims to increase the ratio of renewable energy from 3 per cent ...

o WB Ease of Doing Business 2017: 77th of 190 (i) Sources: Statistiques Tunisie, 2018; WB, 2018; UNDP, 2018; Moody's, 2018. 5 2. Current Status of Renewable Energy in Tunisia ... Table 1: International support to utility-scale renewable energy in Tunisia : 6: 3. DREI Methodology: Key Concepts: Tunisia: Derisking Renewable Energy Investment ...

The nation has set an ambitious goal: to generate 35% of its electricity from renewables by 2030. This target reflects Tunisia's commitment to a more sustainable and responsible use of energy resources. A key part of this strategy is improving energy efficiency across critical sectors like buildings, industry, and transport. The country is targeting a 30% reduction in energy demand ...

Green energy transition Mindful of Tunisia's potential for renewable energy and their common interest in ensuring greater security of energy production and supply between the two Parties, Tunisia and the European

Union are working towards a strategic energy partnership, thus strengthening green growth and job creation.

Despite depending heavily on gas-fired electricity production, declining productivity at key fields and rising energy imports from Algeria have prompted Tunisia to turn to renewables. The government has set out objectives to encourage development, including increasing the contribution of renewable energy to 30% of the energy mix by 2030. This is arguably an ...

Investment to support Tunisia's energy security and green transition and cut CO2 emissions ... It develops, builds, owns and operates solar, wind and hydropower plants and storage solutions. ... In March 2024, it established Aeolus, a joint venture to promote renewable energy business in Africa. Aeolus is owned by Toyota Tsusho's wholly owned ...

For Tunisia, this could mean investing in cutting-edge technologies like renewable energy solutions or advanced AI applications. While these ventures are high-risk, they offer the potential for ...
