Contact G2 Energy Solutions today for a quote! About Craig Green. Craig Green is the managing principal at G2 Energy Solutions, an energy engineering consulting firm based in Phoenix, Arizona. Over the last decade, Craig has performed the energy modeling as well as other energy requirements on dozens of LEED certified projects.

G2 Energy Solutions is an energy engineering consulting firm based in Phoenix, AZ. With over 12 years" experience, we provide energy modeling and utility rebate services to commercial and industrial customers as well as design and construction firms. Our clients have collectively received millions in rebate money from APS and other utility ...

G2 Energy are able to design, build and install bespoke Container Solutions for both the Distribution Network Operator (DNO) Contestable Works and the Client"s electrical infrastructure. As a Lloyds accredited Independent Connection ...

Turkmenistan is a landlocked developing member country (DMC) with abundant gas and oil deposits. Most of the country is desert, with the population concentrated in a few urban areas. Despite the country"s reliance upon hydrocarbons, the government recognizes the importance of climate action and is exploring renewable energy sources, including solar. This shift could ...

This study provides potential transition scenarios to full sustainability for Turkmenistan in power, heat and transport sectors. Vast sunny desert plains of Turkmenistan could enable the country ...

Our team is the most important asset G2 possesses, and we invest heavily in our people to ensure we can be as great as we can be! Our community We know we are privileged to be in our current position, and we pay it forward through our time, energy, and resources to help great causes that are dedicated to making the world a better place.

G2 Energy, one of a small number of companies in the UK authorised to make new grid connections to the country"s electricity transmission and distribution networks, claims it has now surpassed the 100MW mark of battery projects worked on, as it announced the completion of connection works at a new 29MW battery storage facility in Kent, southern ...

G2 Energy, LLC, based in Boise, ID, was formed for the purpose of developing electric power generation from methane at landfill sites. Our company brings together world-class engineers and suppliers who have the equipment, skills, financial resources and technical expertise necessary for timely, successful implementation of high quality, dependable distributed generation projects.

G2 Energy Limited operate a fully audited and verified Integrated Management System certificated by ISOQAR, Lloyds Register and Achilles UVDB. ... Battery Energy Storage Solutions. Completing over 20 fully operational BESS developments, with circa 700MWhr of BESS capacity connected to the grid.

The goal for any existing building study is to understand how a building currently uses energy, and what the opportunities and economic returns for improving the efficiency. There is often a big opportunity for reducing utility costs, especially in older buildings, and we can uncover and quantify those opportunities in a clear and unbiased fashion.

In October 2022, Craig Green of G2 was a speaker at a U.S. Green Building Council (USBGC) sustainability summit in Phoenix! It was a half day summit with lots of talented speakers! Craig's topic was "Maximize the Value of the Energy Modeling Process".

G2 Energy Solutions provides energy modeling for performance path energy code compliance. This allows design teams an alternative to COMcheck for compliance, giving design teams more flexibility (e.g. glass area or performance) and / or the ability to reduce construction budgets by reducing or eliminating aspects of the building that minimally ...

A common theme of these certifications is the need for quantification of the energy efficiency of the building, usually through an energy model. The G2 team has completed energy models for dozens of these types of projects, and have proven systems for ...

Image: Harmony Energy. The closure of UK battery storage specialist EPC and independent connection provider (ICP) firm G2 Energy has been confirmed by Companies House, with a senior manager describing "unsympathetic clients" in comments given to Energy-Storage.news and that the bulk of the team is joining outsourcing giant Mitie.

g2 Energy Generation are actively seeking suitable Embedded Generation Development sites across the UK... Gas is one of the most flexible sources of generation and has proven an attractive prospect to UK developers because it is an efficient form of thermal generation, meaning that more electricity can be produced from less fuel than is the case with other fossil ...

Craig Green of G2 Energy Solutions was among the presenters at the U.S. Green Building Council (USGBC) Mountain Region Spring Summit in Phoenix, AZ on May 4, 2023. Craig's topic was "New paradigms for carbon and water use in buildings". It was a great turn out, and G2 was proud to be among many other distinguished presenters!

Mitie expands battery energy storage and electrical engineering capabilities with addition of former G2 energy team, learn more here. What We Do; About Us; Accreditations; Projects; News & Events; ... allowing us to provide bespoke, cost-effective solutions that get our customers connected to the grid quicker and with greater flexibility. Read ...

P2 Enterprise Upstream is an integrated field to financials solution designed to help large and growing upstream companies manage their production, revenue and cost functions in a consistent, auditable, and repeatable manner that drives down cost, ensures regulatory compliance and provides production and financial visibility across the operation.
