

Turks and Caicos Islands stockage energie thermique

Does Turks and Caicos have a policy on energy efficiency?

Turks and Caicos has few policies related to energy efficiency and renewable energy. Historically, the territory has not implemented policy mechanisms to aid in the development of clean and energy-efficient technologies.

Could ocean thermal energy help Turks and Caicos meet its peak demand?

Once wave and ocean thermal technologies are proven in the marketplace, ocean energy and ocean thermal energy conversion have potential as well. Abundant wind and solar resources, as well as the potential for other renewable sources could help Turks and Caicos meet or exceed its peak demand of 34.7 MW.

Who owns Turks & Caicos utility limited (TCU)?

Turks & Caicos Utility Limited (TCU) is wholly owned by Fortis TCI and provides electricity to Grand Turk and Salt Cay. In 2010, the government of Turks and Caicos contracted with a consultant to draft recommendations for exploring the use of renewable energy and energy efficiency technologies to create a more sustainable energy framework.

How much does electricity cost in Turks and Caicos?

The 2015 electricity rates in Turks and Caicos are \$0.29 per kilowatt-hour (kWh), slightly below the Caribbean regional average of \$0.33/kWh. Like many island nations, Turks and Caicos is almost 100% reliant on imported fossil fuel, leaving it vulnerable to global oil price fluctuations that have a direct impact on the cost of electricity.

Who owns Turks & Caicos electric grid?

The government-owned Turks and Caicos electric grid was privatized in 2006 through a series of acquisitions to create a vertically integrated structure. Fortis TCI, a wholly owned subsidiary for Fortis Inc., is an international utility holding company that owns and operates generating stations and distribution lines across the islands.

Who regulates the electricity sector in Turks and Caicos?

Four main entities are responsible for governing the electricity sector in Turks and Caicos. The governor grants and revokes licenses, regulates the level and structure of tariffs that electric companies can charge for various customer groups, and approves changes to these regulations.

There is ample evidence that logging took place throughout the Turks and Caicos Islands, probably to meet both local and foreign demand for lumber. Exported lumber would likely have ...

Sargassum on the remote McCartney Cay in the Turks and Caicos. Photo taken in 2018. Sargassum is a yellow, reddish, or brown seaweed that washes up on some beaches. In recent years, sargassum has made headlines due to its impact and accumulation on beaches in the Caribbean, Lucayan Archipelago, Antilles, and Florida.

The Turks Island Passage, the deep channel that separates the Turks Islands from the Caicos Islands, tends to funnel whales close to Salt Cay. Salt Cay is an amazing destination for whales, diving, and secluded beaches, yet doesn't offer much more than that, and likely wouldn't appeal to those seeking an active vacation.
