

What is the Tuvalu coastal adaptation project?

About the Tuvalu Coastal Adaptation Project With US\$36 million financing from the Green Climate Fund and US\$2.9 million co-financing from the Government of Tuvalu, the 7-year Tuvalu Coastal Adaptation Project is contributing to strengthening the resilience of one of the world's most vulnerable countries to climate change and sea-level rise.

Is the reclamation of land in Tuvalu a successful climate adaptation strategy?

The reclamation of land in Tuvalu has been and will continue to be a successful component of its overall climate adaptation strategy. But it is far from the only piece of the puzzle. Technology is rapidly evolving and its advancements are being utilized to adapt to the effects of climate change.

Should Tuvalu continue to be a climate adaptation leader?

Therefore, both strategies should continue to be undertaken to preserve Tuvalu as the disastrous effects of climate change persist. Despite being one of the smallest countries in the world, Tuvalu has one of the loudest voices in the climate sphere. Tuvalu must continue to be a climate adaptation leader to show the world there is still hope.

How is land reclamation done in Tuvalu?

The sediment is brought to the surface and used to fill large sandbags, which are layered to construct the reclaimed land. As part of the Tuvalu Coastal Adaptation Project, land reclamation has been undertaken on the main island of Funafuti, but also on the outer islands of Nanumea and Nanumaga.

Is Tuvalu A parliamentary democracy?

It is a parliamentary democracy with a unicameral parliament consisting of 16 members without political parties. Tuvalu's total area is 26 square kilometers (10 square miles), but the nation has been losing land as the sea level continues to rise.

How does LiDAR work in Tuvalu?

LiDAR was deployed to rapidly collect precise information on land surface height and sea floor depth. Data was collected in all of Tuvalu's nine atoll systems, including islands and surrounding reefs and lagoons, amounting to around 500 square kilometres in total.
