

How TEC is powering Tuvalu with renewable resources?

TEC has set a vision of "Powering Tuvalu with Renewable Resources" and this aligns well with the Tuvalu Government set target of 100% renewable energy by 2025. All the islands of Tuvalu are on 24/7 power supply and the access rate is 100%. The outer islands are powered by hybrid solar PV system with diesel generator on standby.

What is Tuvalu's energy plan?

Tuvalu has two stated goals: o To generate electricity with 100% renewable energy by 2020 o To increase energy efficiency on Funafuti by 30%. The Plan is intended for use by the Government of Tuvalu (GoT), the Tuvalu Electricity Corporation (TEC), potential donors, community representatives and other relevant stakeholders.

What is the Tuvalu solar power project?

The Government of Tuvalu worked with the e8 group to develop the Tuvalu Solar Power Project, which is a 40 kW grid-connected solar system that is intended to provide about 5% of Funafuti's peak demand, and 3% of the Tuvalu Electricity Corporation's annual household consumption.

Who uses the Tuvalu electricity plan?

The Plan is intended for use by the Government of Tuvalu (GoT), the Tuvalu Electricity Corporation (TEC), potential donors, community representatives and other relevant stakeholders. It is a working document and will be regularly reviewed and updated as new information becomes available.

Where does Tuvalu electricity come from?

Tuvalu's power has come from electricity generation facilities that use imported diesel brought in by ships. The Tuvalu Electricity Corporation (TEC) on the main island of Funafuti operates the large power station (2000 kW).

How can TEC help Tuvalu move towards a low-emissions future?

Helping Tuvalu move towards a low-emissions future by powering with Renewable Energy. Leadership ensures everything outlined in TEC's plan comes to fruition, that all activity is aligned to the company's strategic pillars and that the company is on track to achieve its goals.
