What is the Tuvalu solar power project?

The Government of Tuvalu worked with the e8 group to develop the Tuvalu Solar Power Project, which is a 40 kW grid-connected solar system that is intended to provide about 5% of Funafuti's peak demand, and 3% of the Tuvalu Electricity Corporation's annual household consumption.

What is Tuvalu's energy plan?

Tuvalu has two stated goals: o To generate electricity with 100% renewable energy by 2020 o To increase energy efficiency on Funafuti by 30%. The Plan is intended for use by the Government of Tuvalu (GoT), the Tuvalu Electricity Corporation (TEC), potential donors, community representatives and other relevant stakeholders.

Does Tuvalu have a good sector plan?

Apart from the well-supported energy sector, Tuvalu has little comprehensive sector planning.

Who uses the Tuvalu electricity plan?

The Plan is intended for use by the Government of Tuvalu (GoT), the Tuvalu Electricity Corporation (TEC), potential donors, community representatives and other relevant stakeholders. It is a working document and will be regularly reviewed and updated as new information becomes available.

What was the first large scale solar system in Tuvalu?

The first large scale system in Tuvalu was a 40 kW solar panel installation on the roof of Tuvalu Sports Ground. This grid-connected 40 kW solar system was established in 2008 by the E8 and Japan Government through Kansai Electric Company (Japan) and contributes 1% of electricity production on Funafuti.

Where does Tuvalu electricity come from?

Tuvalu's power has come from electricity generation facilities that use imported diesel brought in by ships. The Tuvalu Electricity Corporation (TEC) on the main island of Funafuti operates the large power station (2000 kW).
