

What makes robopac unique?

The use of advanced technologies and of the utmost attention to safety systems represents the essence of the developing capacity of Robopac. The machine is provided with a high level of packaging autonomy and great work flexibility and built to wrap and stabilize palletized loads of any shape, size and weight, using stretch film.

What is a um code for the Pacific Islands?

Except for Midway Atoll, the Pacific islands are surrounded by large exclusive economic zones and are within the bounds of the Pacific Remote Islands Marine National Monument. They are collectively represented by the ISO 3166-1 alpha-2 code UM. The individual islands have ISO 3166-2 numerical codes.

Why should you choose robopac?

The use of advanced technologies and of the utmost attention to safety systems represents the essence of the developing capacity of Robopac and provided with a high level of packaging autonomy and great work flexibility. The machine is built to wrap and stabilize palletized loads of any shape, size and weight, using stretch film.

The Recycling machines category is a concrete response to the growing attention to sustainability and to a concept of circular economy which, like Robopac and as a Group, is strongly pursued. This is why ReCYCLE was born, a compacting machine dedicated to the recycling of raw materials. In fact, ReCycle compacts consumables, such as empty and non-reusable ...

The Orbit Range is where two technologies meet. The flexibility needed by high speed and high performance line machines becomes available on Entry Level horizontal machines to be added to work cells or integrated lines.

Manual Seal and Shrink packaging machines ensure, just with one operation, sealing and shrinking on products to be packed. Thanks to their high reliability, and ease in operation they have a wide range of applications in a large variety ...

Rotary is the ideal solution for wrapping the particularly unstable products with stretch film. The ability to keep the pallet still and stabilizing products with a rotating arm is often a necessity for many industries. The Rotary family itself ...

HELIX MAX is the latest rotary arm fully automatic stretch wrapper developed by Robopac, thanks to its special patented pre-stretch carriage with two reels, makes possible the impossible: a wrapping cycle extremely resistant to tearing, superior to any traditional systems, helping to reduce downtimes due to film breaks. Thanks to its special PATENTED pre-stretch carriage, ...

U S Outlying Islands robopac battery

Masterwrap HD Plus XL is Robopac's new semi-automatic rotating arm wrapping machine. It can be used with reels up to 20 kg, it is characterized by a particularly robust and reliable structure, which makes it ideal for operations with unstable and / or irregular pallets.

Easily movable battery thanks to the weight of less than 15 kg. Battery indispensable in the case of continuous use of ROBOT S7, or when it is not possible to use the whole night or sacrifice a ...

Registered office: Strada Provinciale Marecchiese, 59 - 47826 - Villa Verucchio (RN) Fiscal code / VAT number: 01551781204 Registration: Romagna - Forlì - Cesena and Rimini business register REA No: RN - 33134 Share capital: Euro 10,000,000.00 web agency extera

Automatic stretch wrapper that allows low investment costs and, consequently, high levels of competitiveness guaranteeing low consumption of electricity, low maintenance, high reliability and long service life. The machine works with the exclusive system that powers prestretch driven units with batteries charged during machine pauses at pallet infeed and outfeed.

The device works through spring steel (ROBOPAC SYSTEMS patent), with a proportional reduction of the film band also include an air blower device to seal the initial edge of the film within the wrapping. The device is specifically designed to guarantee perfect finishing of the end edge of the film by electronically controlled impulse sealing on constant film thickness.

Manual Seal and Shrink packaging machines censure, just with one operation, sealing and shrinking on products to be packed. Thanks to their high reliability, and ease in operation they have a wide range of applications in a large variety of fields such as: Foodstuffs, Graphics, Chemicals, Cosmetics, Electronics, Toys, Pharmaceuticals, Textiles, Plastic materials etc.

Supervisor. The supervision system is designed to manage missions, criteria for the dynamic allocation of vehicles. It is interconnected with the other company devices, such as PC, PLC, database and ERP systems its purpose is to define, monitor, forecast and archive all the information relating to the logistics system devices, especially Auriga laser guided vehicles.

The control panel is the brain of Rototech, here lies the heart of the machine and technology Robopac ie Cube Technology. overview. The ability to keep the pallet still and stabilizing products running a rotating arm is often a necessity for many industries. The Rotary family is of superior quality in a technological environment important for ...

Robopac's automated integrated solutions are the cornerstone of efficiency and performance in end-of-line automation. The solution, which can be fully modulated according to production requirements, allows production and logistics to be optimised ...

1430300125 PLCs/Machine Control from ROBOPAC 2-Year Warranty, Radwell Repairs - ELECTRONIC

Walmart of Mexico and Central America has chosen Robopac as reference supplier for the wrapping machines in use in its numerous product distribution centers spread throughout Mexico. More info. Masterplat Plus.

High infeed case palletizer model groups share common functional modules and frame systems to provide comprehensive palletizer solutions. Shared modules maximize layout flexibility while reducing cost through increased ...

Very high speed rotating ring machine with two pre-stretch carriages. Genesis Thunder is a real concentrate of technology, able to obtain absolute level performances both in terms of speed and material saving, as well as load stabilization that prevents damages that can affect the quality of the final product and the resulting waste. Thus, constituting an indirect source of economic and ...

Supervisor. The supervision system is designed to manage missions, criteria for the dynamic allocation of vehicles. It is interconnected with the other company devices, such as PC, PLC, database and ERP systems its purpose is to ...

Automatic DOUBLE CARRIAGE stretch wrapper that allows low investment costs and, consequently, high levels of competitiveness guaranteeing low consumption of electricity, high reliability and long service life. Double pre-stretch carriage machine, construction solutions were adopted to minimise transport costs and installation time with economic advantages for the ...

The Caribbean islands considered part of the United States Minor Outlying Islands include Navassa Island, a small island off the coast of Haiti that is claimed by both Haiti and a small group of Columbians calling the island a sovereign nation; the Baja Nuevo Bank, a small uninhabited sand bank; and the Serranilla Bank, a larger, mostly ...

United States Minor Outlying Islands),ISO 3166-1"UM"???

Rotary is the ideal solution for wrapping the particularly unstable products with stretch film. The ability to keep the pallet still and stabilizing products with a rotating arm is often a necessity for many industries. The Rotary family itself as superior quality product in a technological environment important for end-line packaging. This machine has excellent technical and ...

Automatic welding of the protective film on the product before entering the horizontal wrapper. 3 different length available. 750 mm with L 750 mm reel. 1500 mm with L 1500 mm reel. 2000 mm with L 2000 mm reel

U S Outlying Islands robopac battery

*The dimensions of the workable product vary according to the combined wrapping machine
