Power System Analysis & Optimization Analysis & Optimization A powerful set of analysis and optimization software products that allow for simulation, prediction, design and planning of system behavior utilizing an intelligent one-line diagram and the flexibility of a multi-dimensional database.

The U. S. Virgin Islands Water and Power Authority (WAPA) is a public-power utility whose core purpose is to enhance the economic development and the quality of life for people living in the U.S. Virgin Islands and the surrounding ...

As part of the Smart Grid Solution, ETAP Distribution Management System provides the necessary mission critical applications for managing, controlling, visualizing, optimizing and automating distribution networks from state-wide to city-wide power distribution networks as well as Microgrid applications for industrial/commercial facilities.

The ETAP Switching Order Management (SOM) enables power system dispatchers, operators and managers to request, assign, track, and log switching work orders. Using HTML5 Based technology with communication with mobile apps, the ETAP SOM connects the maintenance and outage response crews with the control center for complete management of ...
