Since 2008, we've served the U.S. Virgin Islands residents as a leading provider of renewable energy products for homes and Commercial Structures. We've assisted hundreds of families and business owners make the switch to solar energy, helping them save money and the environment at the same time.

Another issue is power. Our power company has frequent outages (every 1-2 weeks). Most are short (10 minutes or so) and many of us, including ourselves have generators that kick on as soon as an outage is detected. We have solar and will soon be installing a whole home battery, so any outage won't even interfere with our broadband service.

lowering the cost barrier to adoption of battery energy storage options. The program will afford residents the opportunity to increase their energy resiliency and bridge gaps in utility services in the U.S. Virgin Islands. The program benefits will contribute both financially and environmentally to meet established goals: 1.

Effective Nov. 8, the Virgin Islands Energy Office overhauled the Virgin Islands Energy Storage (VIBES) program, opening up the application specifications to allow for larger battery systems to participate. VIBES is all about keeping the lights on, even when a storm or other event causes electrical service in the territory to be disrupted.

U.S. Virgin Islands - Today, the Virgin Islands Energy Office was selected to receive approximately \$62.5 million from the U.S. Environmental Protection Agency through the Solar for All grant program. The funding will be leveraged to develop long-lasting solar programs that enable low-income and disadvantaged communities to benefit from solar power.

Washington, DC - The U.S. Environmental Protection Agency announced this week that the Virgin Islands Energy Office (VIEO) was selected to receive approximately \$62.5 million to develop solar programs - the highest amount available to the territory in this competitive grant program. The grant will enable low-income
