

Why is the UK reviewing its energy transition strategy?

The review came at a timely moment, as the United Kingdom is in the process of reviewing its energy transition strategy to align with industrial and energy security goals. The United Kingdom was one of the first major economies to legally establish a net zero target in 2019.

How many homes will GBIs upgrade in 2024?

GBIS will upgrade over 300,000 homes. 2024 to 2035: Launch in early 2024, 3 application windows will run until closure in April 2025. Projects to complete by 2032 at the latest, 5 year monitoring period will conclude 2037. 2023: Launch digital SME advice service; SME energy advice scheme pilot.

How will the energy transition affect the UK?

In the coming years, the United Kingdom will need to ensure the continued buildout of low-emissions generation to displace unabated gas, replace nuclear closures and keep up with load growth driven by electrification. Moreover, the energy transition will necessitate an unprecedented buildout of grid infrastructure.

Will the government invest in long duration electricity storage by 2024?

The government will put in place an appropriate policy framework by 2024 to enable investment in large scale long duration electricity storage (LLES), with the goal of deploying sufficient storage capacity to balance the overall system.

How has the UK electricity sector changed in recent years?

The UK electricity sector has undergone major changes in recent years, with a sizeable reduction in coal power generation and rapid deployment of renewable energy sources.

What is the UK fusion strategy?

In 2021, the 'UK Fusion Strategy' set out ambitious objectives to demonstrate the commercial viability of fusion by building a prototype fusion power plant capable of providing energy to the UK grid by 2040, and to build a world-leading fusion industry with high-export potential.
